## SCOTLAND.

*Report from Glasgow.*GLASGOW, SCOTLAND, *October 1, 1900.*

SIR: I have the honor to make the following report for the week ended September 29, 1900: Eight vessels were inspected, 2 of which sailed for Canadian ports. There were inspected 649 members of crew, 631 cabin and 183 steerage passengers, and 17 cattlemen. One hundred and seventy-eight pieces of baggage were inspected and passed and 18 disinfected and labeled.

The sanitary conditions of the port are looking better. No new case of plague has been reported for nearly two weeks. Two deaths have occurred among those in hospitals, 1 being an infant born while the mother was suffering from plague. There are, therefore, now in hospital 21 cases, and there have been to date 7 deaths. It is to be hoped that no more cases may appear. The number of contacts has been greatly reduced, and there is now a comparatively small number under observation. Of other infectious diseases, smallpox remains about the same, and no new cases of typhus have developed.

Shipping has been rather heavy for the past week, 2 of the largest liners leaving on the same day.

During the week a rumor of plague in Perth was circulated, but this has been officially denied.

Respectfully,

A. R. THOMAS,  
*Passed Assistant Surgeon, U. S. M. H. S.*

The SURGEON-GENERAL,  
*U. S. Marine-Hospital Service.*

*Vessels sailing from Glasgow for American ports.*

[Cablegrams.]
